

## Nylon Cable Ties

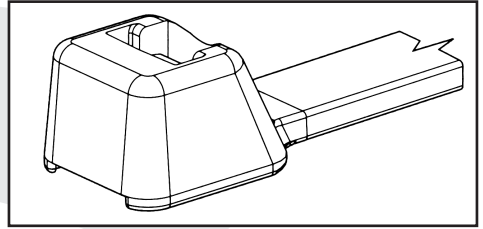

### Features & Benefits

#### 1. One Piece Construction

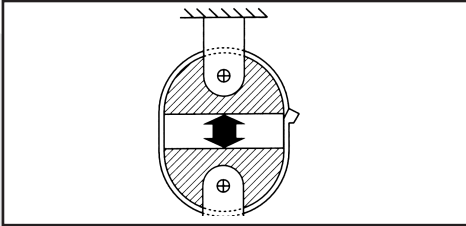

- Consistent performance and reliability
- Available in lengths from 71mm to 1112mm
- More teeth per mm

#### 2. Smooth, Round Edges

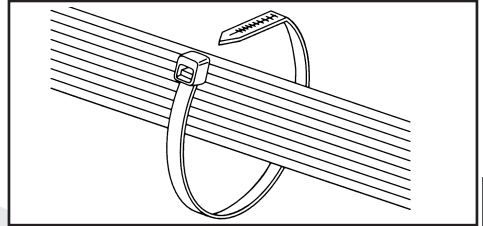

- Prevents damage to wire insulation
- Ease of installation

#### 3. Tensile Strength

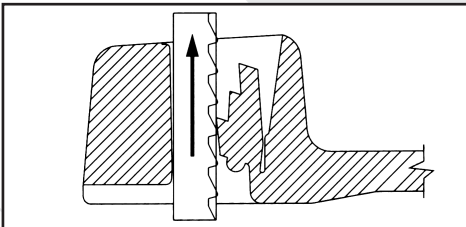

- Tensile strengths from 36N to 1112N
- Exceeds Industry and Military standards

#### 4. Curved Tip

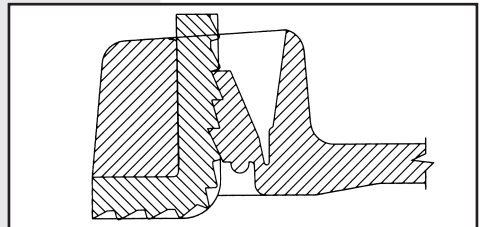

- Orients tip towards head to speed installation
- Faster initial threading
- Easier pick up from flat surfaces

#### 5. Low Threading Force

- Lowest threading force of any one-piece cable tie in the industry
- Thin tapered tip facilitates threading, easier initial insertion reducing operator fatigue

#### 6. One Piece Locking Design

- Multiple locking tooth design provides greater strength and reliability
- Available in self locking or releasable styles for use in applications where changes are anticipated

**Note:** Available in a variety of materials to meet the needs of demanding environments. For further information on the extensive range of cable ties and accessories available or assistance with your specific requirements, please contact us.
