

SRT Tape

Silicone Rubber Tape

Description

Silicone rubber tape is a tough, resilient, self fusing and adhering black tape, ideal for covering irregular shapes and objects. It can also be used for masking ends and sections of shafts and tubes.

Applications

The tape is extremely flexible, self-amalgamating and it's ability to operate under extreme temperatures, allows it to be used in demanding environments. Silicone rubber tape provides a fast, efficient and cost effective solution for applications, including sealing holes, splits, breakages and component, hose and harness protection and repair.

Features & Benefits

- Tough and flexible
- High temperature performance
- Self adhering and fusing
- Fast and efficient
- Suitable for a wide range of surfaces

Operating Temperature

- -65°C to +260°C

Ordering Information

Tape Description	Width	Thickness	Length	Colour	Part Number
