

INTRODUCTION

Extensive Range of **SPECIALITY HIGH TEMPERATURE ADHESIVES & TAPES**

**for electrical, structural,
and industrial applications.**

We provide a range of high performance adhesives, fillers, coatings, tapes and cloths designed for operation under the harshest environmental conditions. Ideally suited for insulating and bonding to an extensive range of materials, including metals, ceramics, plastics and glass, with the majority offering the advantage of curing at room temperature.

Found across many industries including Aerospace, Automotive, OEM Electronics, Fabrication and Foundries, with an extensive range of applications covering bonding, potting, sealing, casting, moulding and coating.

For whatever the application demands, be it sustained high temperature operation, thermal shock stability, corrosion, abrasion and/or chemical resistance while maintaining excellent electrical and mechanical performance characteristics, we have a solution.

PERFORMANCE epoxy / thermoset solutions, operating temperatures up to **200°C**

EPOXY compounds and fillers, operating temperatures up to **340°C**

CERAMIC compounds and materials, operating temperatures up to **3,000°C**

SELECTION GUIDES	Epoxy / Thermosets Characteristics	page 172
	Hot Melt / Thermoplastics Characteristics	page 174
	Butyl Sealants Characteristics	page 174
	Adhesive & Sealants Compatability Chart	page 176
PERFORMANCE SOLUTIONS up to 200°C		
Adhesives	S1005, S1006 and S1009	page 178
Tape adhesives	S1017, S1030 and S1048	page 179
Tape sealants	S1297, S1255-04 and S1305	page 180
Epoxy two part adhesive	S1125	page 181
	RT125	page 182
Silicone Tapes	66N, 67N and 68N	page 183
	SRT	page 184
Polyimide adhesive tape	ISK22	page 185
HIGH TEMPERATURE SOLUTIONS above 200°C
